.280 Rem.

The .280 Rem., which was introduced in 1957, is also known under the name 7 mm Rem. Express. It is pleasant to shoot and with good precision very well suited for light and medium-sized cloven-hoofed game.

Since 1997, GECO has been producing a 165 gr Softpoint bullet, which has been popular up until today.

GECO Softpoint

Thousands of roe deer have been shot with the legendary GECO Softpoint bullet which is suitable for universal use and in almost any hunting situation. It responds reliably in the game's body and has good target ballistic effectiveness. The thin walled jacket of the bullet is the secret of this successful design, deformation is initiated by the marked lead tip and then the jacket responds to the increased resistance, even with heavy game the deformation process remains well controlled.

Construction GECO Softpoint bullet

Universally usable and copes with almost any hunting situation.

1. **GECO Classic Tip:** For safe deformation and stability
2. **GECO Lead Core:** For a well-balanced performance
3. **GECO TS Jacket:** For precision and barrel protection
