## 8 x 57 IS

In 1905, the 8 x 57 IS was developed from the old military cartridge 8 x 57 I – the “S” stands for spitzer bullet. This universally usable calibre can be optimally used for all game occurring in Europe, because as a rule there is less haematoma formation with it.

With the 185 gr Softpoint bullet and the Target as well as with the 196 gr GECO Plus bullet GECO is offering a broad range of this popular calibre. For all fans of lead-free ammunition, there is a new load of GECO ZERO with a bullet weight of 139 gr.

## GECO Softpoint

Thousands of roe deer have been shot with the legendary GECO Softpoint bullet which is suitable for universal use and in almost any hunting situation. It responds reliably in the game's body and has good target ballistic effectiveness. The thin walled jacket of the bullet is the secret of this successful design, deformation is initiated by the marked lead tip and then the jacket responds to the increased resistance, even with heavy game the deformation process remains well controlled.

### Construction GECO Softpoint bullet

Universally usable and copes with almost any hunting situation.

1. **GECO Classic Tip:** For safe deformation and stability
2. **GECO Lead Core:** For a well-balanced performance
3. **GECO TS Jacket:** For precision and barrel protection
