9.3 x 62

The 9.3 x 62 was developed around the year 1905 and to date is a popular calibre for hunting Central European large game, in particular moose, red deer and wild boar. Furthermore, this calibre is very popular for drive hunting.

The GECO loads with a bullet weight of 255 gr are optimally suitable for this type of hunting. The lead-free bullet GECO ZERO is available in a light load with a weight of 184 gr.

GECO Softpoint

Thousands of roe deer have been shot with the legendary GECO Softpoint bullet which is suitable for universal use and in almost any hunting situation. It responds reliably in the game's body and has good target ballistic effectiveness. The thin walled jacket of the bullet is the secret of this successful design, deformation is initiated by the marked lead tip and then the jacket responds to the increased resistance, even with heavy game the deformation process remains well controlled.

Construction GECO Softpoint bullet

Universally usable and copes with almost any hunting situation.

1. **GECO Classic Tip:** For safe deformation and stability
2. **GECO Lead Core:** For a well-balanced performance
3. **GECO TS Jacket:** For precision and barrel protection
