.30-06

The .30-06 has developed into probably one of the most popular universal calibres from its development in the year 1903 up until today. Quickly, this calibre was used in repeating rifles and break-open rifles.

GECO meets everybody's requirements with their bullets.

GECO Express

The GECO Express gives a flat trajectory, a high bullet velocity and a fast energy transfer – all combined in a unique new GECO design. The streamlined bullet shape combined with the new GECO Express Tip allows for extremely precise long distance shots without correction of the aiming point. The jacket design allows high bullet velocities which are maintained right to the target and give an extremely high energy yield resulting in clean kills.

Construction GECO Express bullet

Suitable for any hunting situation and reliable in effectiveness when long distance shots are required.

1. **GECO Express Tip:** For precision and flatness
2. **GECO BC-Shape:** For a low air resistance
3. **GECO Special Jacket:** For high knock-down power
