.300 Win. Mag.

The .300 Win. Mag., which was introduced in 1963, became a success story worldwide. It is a true all-round cartridge with sufficient power for diverse forms of demanding hunting for hard to kill game. The .300 Win. Mag. is suitable for all cloven-hoofed game.

GECO introduced the 170 gr GECO Softpoint bullet in 1996, the 170 gr GECO Plus and the 165 gr GECO Express followed in the year 2011. The latest innovation is the lead-free GECO ZERO with 136 gr.

GECO Plus

The GECO Plus is a precise projectile designed using the latest technology. The GECO bonding technique is characterised by the extremely strong solder joint between the projectile core and jacket. As a result of this the GECO Plus mushrooms with minimum fragmentation and has excellent penetration even in heavy game or if striking bone. The breaking points visible on the jacket control the deformation and ensure the bullets effectiveness.

Construction GECO Plus bullet

For deep penetration with absolutely minimum carcass damage for deer or even larger game.

1. **GECO Performance Point:** For precision and safe deformation
2. **GECO Grooves:** For controlled effectiveness
3. **GECO Bonding:** For deep penetration and venison protection
