## 6.5 x 55

Even today, the 6.5 x 55 is still widespread among hunters and sport shooters in Scandinavia. Its internal precision is excellent, and as a hunting cartridge it is suitable for all lighter, but also for medium-sized red deer and wild boar.

With the 156 gr GECO Softpoint bullet, it becomes an all-round cartridge for the hunting use in Central Europe. Furthermore, we are offering the GECO Plus with a weight of 156 gr.

## GECO Plus

The GECO Plus is a precise projectile designed using the latest technology. The GECO bonding technique is characterised by the extremely strong solder joint between the projectile core and jacket. As a result of this the GECO Plus mushrooms with minimum fragmentation and has excellent penetration even in heavy game or if striking bone. The breaking points visible on the jacket control the deformation and ensure the bullets effectiveness.

### Construction GECO Plus bullet

For deep penetration with absolutely minimum carcass damage for deer or even larger game.

1. **GECO Performance Point:** For precision and safe deformation
2. **GECO Grooves:** For controlled effectiveness
3. **GECO Bonding:** For deep penetration and venison protection
