7 x 64

The 7 x 64, which was introduced in 1917, is the most used hunting rifle cartridge in the Central European region. It was developed from the 7 x 57, which was already introduced in 1892. It is suitable for any cloven-hoofed game.

With the 165 gr GECO Softpoint bullet as well as with the 155 gr GECO Express and the 170 gr GECO Plus it becomes an all-round cartridge in Central Europe for the hunting use. In 2015 GECO introduced the lead-free GECO ZERO with 127 gr.

For the hunting-oriented practice shooting the GECO Target bullet is suitable.

GECO Express

The GECO Express gives a flat trajectory, a high bullet velocity and a fast energy transfer – all combined in a unique new GECO design. The streamlined bullet shape combined with the new GECO Express Tip allows for extremely precise long distance shots without correction of the aiming point. The jacket design allows high bullet velocities which are maintained right to the target and give an extremely high energy yield resulting in clean kills.

Construction GECO Express bullet

Suitable for any hunting situation and reliable in effectiveness when long distance shots are required.

1. **GECO Express Tip:** For precision and flatness
2. **GECO BC-Shape:** For a low air resistance
3. **GECO Special Jacket:** For high knock-down power
