7 mm Rem. Mag.

The 7 mm Rem. Mag. was introduced in 1962. It belongs to the family of the so-called magnum cartridges. This calibre is suitable for repeating rifles with standard systems. Until today, hunters have used this calibre in Europe, what is to be attributed to a more extended trajectory and consequently higher velocities as opposed to the 7 x 64.

GECO followed this trend with the introduction of the 165 gr SOFTPOINT bullet in 1995. Presently, the assortment comprises moreover the loads GECO EXPRESS with 155 gr bullets and GECO Plus with a weight of 170 gr. For all hunters preferring lead-free ammunition, we offer the GECO ZERO with a weight of 127 gr.

GECO Express

The GECO Express gives a flat trajectory, a high bullet velocity and a fast energy transfer – all combined in a unique new GECO design. The streamlined bullet shape combined with the new GECO Express Tip allows for extremely precise long distance shots without correction of the aiming point. The jacket design allows high bullet velocities which are maintained right to the target and give an extremely high energy yield resulting in clean kills.

Construction GECO Express bullet

Suitable for any hunting situation and reliable in effectiveness when long distance shots are required.

1. **GECO Express Tip:** For precision and flatness
2. **GECO BC-Shape:** For a low air resistance
3. **GECO Special Jacket:** For high knock-down power
