## 7 x 57 R

The rimmed version of the 7 x 57, which was introduced in 1893, was developed for combination hunting rifles.

The hunting use has always had priority here – although the calibre has lost its importance for shooting with modern weapons today. With the 165 gr Softpoint bullet GECO is offering a standard load, which meets all requirements. With well-aimed hits, the effectiveness is immaculate. Therefore, the GECO ZERO (lead-free) with a weight of 127 gr is available in this calibre.

## GECO ZERO

GECO ZERO is GECO's newest development. It distinguishes itself with premium accuracy and outstanding stopping power – and is completely lead-free! This highly innovative jacketed bullet has two tin cores. Assisted by the hollow-point design, the pre-fragmented front core disintegrates instantly upon contact with the targeted animal and releases a large portion of its energy to quickly bring it down. Together with the jacket, the rear core remains a stable slug to penetrate and provide a certain exit wound. This makes GECO ZERO an excellent choice especially on light to medium game.

### Construction GECO ZERO bullet

GECO ZERO: Lead-free bullet with great accuracy and terminal effect – for all game.

1. **GECO Performance Point:** for accuracy and certain expansion
2. **Pre-fragmented tin front core:** for reliable performance and solid stopping power
3. **Rear cannelure:** for high weight retention and a certain exit wound
