## 7 x 64

The 7 x 64, which was introduced in 1917, is the most used hunting rifle cartridge in the Central European region. It was developed from the 7 x 57, which was already introduced in 1892. It is suitable for any cloven-hoofed game.

With the 165 gr GECO Softpoint bullet as well as with the 155 gr GECO Express and the 170 gr GECO Plus it becomes an all-round cartridge in Central Europe for the hunting use. In 2015 GECO introduced the lead-free GECO ZERO with 127 gr.

For the hunting-oriented practice shooting the GECO Target bullet is suitable.

## GECO ZERO

GECO ZERO is GECO's newest development. It distinguishes itself with premium accuracy and outstanding stopping power – and is completely lead-free! This highly innovative jacketed bullet has two tin cores. Assisted by the hollow-point design, the pre-fragmented front core disintegrates instantly upon contact with the targeted animal and releases a large portion of its energy to quickly bring it down. Together with the jacket, the rear core remains a stable slug to penetrate and provide a certain exit wound. This makes GECO ZERO an excellent choice especially on light to medium game.

### Construction GECO ZERO bullet

GECO ZERO: Lead-free bullet with great accuracy and terminal effect – for all game.

1. **GECO Performance Point:** for accuracy and certain expansion
2. **Pre-fragmented tin front core:** for reliable performance and solid stopping power
3. **Rear cannelure:** for high weight retention and a certain exit wound
