.30-06

The .30-06 has developed into probably one of the most popular universal calibres from its development in the year 1903 up until today. Quickly, this calibre was used in repeating rifles and break-open rifles.

GECO meets everybody's requirements with their bullets.

GECO ZERO

GECO ZERO is GECO's newest development. It distinguishes itself with premium accuracy and outstanding stopping power – and is completely lead-free! This highly innovative jacketed bullet has two tin cores. Assisted by the hollow-point design, the pre-fragmented front core disintegrates instantly upon contact with the targeted animal and releases a large portion of its energy to quickly bring it down. Together with the jacket, the rear core remains a stable slug to penetrate and provide a certain exit wound. This makes GECO ZERO an excellent choice especially on light to medium game.

Construction GECO ZERO bullet

GECO ZERO: Lead-free bullet with great accuracy and terminal effect – for all game.

1. **GECO Performance Point:** for accuracy and certain expansion
2. **Pre-fragmented tin front core:** for reliable performance and solid stopping power
3. **Rear cannelure:** for high weight retention and a certain exit wound
