

## GECO Coated Competition Buck Shot 12/65 27,0

g

Item no. 2400232

### Properties

Shot size	0 mm
Shot number	
Calibre	12/65
Mouth velocity	410
Load weight	27 g
Content single packaging	25

### GECO Coated Competition Buck Shot

These buck shot cartridges have been especially developed for IPSC matches which include mandatory buck shot stages. The nickel-plated shot reduces flyers even with tighter chokes.

#### Therefore the shot Shell has the following specific properties:

- 9 pellets of 8 mm diameter for the best possible patterns
- Nickel-plated shot. This reduces flyers even with tighter chokes.
- Very tight patterns thanks to a solid, un-slit shot Cup
- Short case length for higher capacity in tubular magazines
- Reliable function even in finicky semi-autos
- Low recoil
