<i>E[J]</i>	460	319	227	-	-	-	-

RWS Magnum FMJ

The RWS MAGNUM FMJ reaches an extremely high velocity. This guarantees an extended trajectory of up to 100 m for hunting and high energy release in the target.

For this reason, this small-calibre ammunition is very good for hunting small game.

In addition, it causes very little damage to the game's meat because it only minimally perforates the pelt.

RWS Magnum FMJ at a glance:

- Rimfire cartridge for hunting small game
- small-caliber ammunition
- little damage to the game's meat
- extremely high velocity
- extended trajectory
- calibre .22 Magnum
