		Diameter barrel:	<b>50 mm</b>

## VARIANT DESCRIPTION

The JAKT SUPER KOMPAKT on-barrel silencer with included XTRM steel mesh makes it possible to keep the open sights on the rifle. So that you can continue to concentrate on the essentials. Six pressure distribution chambers in front of the muzzle and the additional XTRM winding around the core ensure very good gas turbulence and an exceptional sound pressure level reduction of up to -29 dB. This protects the user's ears, those of their companion and those of their dog with lasting success. And that with a small weapon extension of 156 mm.
